

COMPANY PROFILE

OUR STORY

RAIN INTERNATIONAL began with the dream of bringing the power of seeds to the masses and to build a lasting company that would provide a long term home for distributors. Rain International is the first to harness the concentrated power of botanical seeds in their most unaltered state to create delicious, powerful packets of pure nutrition. That dream is being realized and we are now taking seeds to the masses in 15 markets world wide, most recently in North America.

THE RESULT: Soul. Natural strength and vitality unlike any other supplement can provide. The powerful antioxidants and essential fatty acids extracted from nature's finest seeds provide more energy, better performance for the body and mind, and help to combat today's most pressing health issues. Soul has made nature's original source of power—seeds—available to the masses.

SEEDS ARE MOTHER NATURE'S SECRET, naturally concentrated with the elements of life and vitality in their most powerful form. We utilize these Non-GMO seeds in their entirety, with a unique cold press process to maximize their benefits and bio-availability. Ancient civilizations revered certain seeds for their medicinal qualities, and many spoke of the same seed: black cumin. Contemporary science shows that the healing properties of black cumin are due to various compounds it contains.

BLACK CUMIN SEED is one of Soul's main ingredients. We've combined it with the extracted nutrients of the black raspberry and chardonnay grape seeds to create one synergistic, powerful source of freedom—freedom from pain, freedom from sickness, and freedom to live life to its fullest.

THE PRODUCT

THE SEED COMPANY: Tiny, nutrient rich seeds are the foundation of our product. We source only the most nutrient dense, scientifically researched, and healthful seeds on the planet—all of which are pure and Non-GMO.

The secret isn't just the seeds, but how we unlock the concentrated nutrition within those seeds. We use a unique cold pressed process that separates the seed fiber from the lipids, which are complex with antioxidants, essential fatty acids, phospholipids, dissolved minerals, and phytosteroids. Even the seed fiber contains water-soluble antioxidant compounds.

Soul's proprietary blend of black cumin seed, raspberry seed, grape seed, and D-ribose offers a punch of powerful nutrition and the following are just a few of the health benefits:

- ▶ **Antioxidant protection**
- ▶ **Cardiovascular support
(From Omega-3,6,& 9 fatty acids)**
- ▶ **Supports immune function**
- ▶ **Increased Physical Energy**
- ▶ **Reduced Inflammation**
- ▶ **Supports mental clarity & focus**
- ▶ **Greater Endurance**

INGREDIENTS

Seeds contain 30x more potent nutrients than any other part of the fruit or vegetable.

BLACK CUMIN SEED (Also known as Black Seed, or Nigella Sativa) has a history that spans over 2500 years, making it one of the safest natural elements for human consumption. Black cumin seed is an adaptogen, which means it is an agent causing adaptive reactions. It has the ability to increase the resistance of the human body, protecting it against various ailments. Clinical trials have shown that black cumin seed oil assists with many ailments and is considered to be one of the greatest health substances of all time.

BLACK RASPBERRY SEEDS contain natural plant chemicals that act as antioxidants to locate and destroy free radicals. In fact, raspberries rank among the top 10 high-antioxidant fruits and vegetables. Among several other benefits, the components in raspberry seeds may help prevent cell damage, preventing premature aging.

GRAPE SEEDS contain high levels of proanthocyanidins which have proven to have a special value for brain health and cognitive function due to their free radical quenching and collagen protecting effects. Proanthocyanidins have been proven to be especially effective in neutralizing the hydroxyl radical, the most damaging of all free radicals, as well as lipid peroxides (rancid fats). Proanthocyanidins have also been shown to noticeably delay the onset of lipid peroxidation and to effectively chelate iron ions. Proanthocyanidins are even able to cross the blood-brain barrier in order to protect delicate brain and nerve tissues.

RIBOSE D, also known by its scientific name, Beta-D-Ribofuranose, is a five-carbon sugar found in every cell in our bodies. Ribose D combines with oxygen and ATP (adenosine triphosphate) to give energy to each cell. Ribose is also present in RNA (ribonucleic acid), which is one of the main information carriers of living organisms.

Our bodies handle Oxidative stress daily, however, if our bodies experience an abnormal increase in free radicals due to exercise, daily stress, excess smoking, excess saturated fat intake, depressed immune system, aging, etc., the body becomes fatigued and less efficient in producing Ribose D to replenish cellular energy. Because of this, we need to supplement with Ribose D in order to regenerate the cells energy system.

TESTIMONIALS

DENISE - "When I first started taking it, I was using it for facials too. The product just like drew everything out that was toxic and I thought, huh. But you could definitely see my face was a lot brighter, so I used it for facials, I use it for just about everything. This is the best thing that has ever happened to us as far as a Holistic product and a company that's building a business with a Holistic approach. I think it's something that's really meant for people who believe and trust in a Holistic process and care enough to share this."

.....

DREEMA - "One of the reasons why Soul is meaningful to me is because it allows me to have a better quality of life. It's not just another put on the shelf product, I think it's something that I can say is real. Not only do I feel better, I see there is measurable outcomes for me, its just really been a good thing...its been a blessing."

JEDD - I have been a Physical Therapist for 19 years. I am always looking for a product that would help my clients and to this date I have never found one that would effectively help them for inflammation. I initially tried Soul on myself and then eventually started to break it in with the patients. I have seen a significant improvement with the patient's alleviation of pain since I have started using the product topically. It's important to let them know that we all take supplements and we all take vitamins and most of those are synthetic. And our body has a difficult time absorbing because it's not bioavailable to our bodies and so this product is giving you all the nutrition that your body needs and it's seed based, so it's natural and our body is able to absorb that and utilize it. So, it's a broad-spectrum benefit for our bodies.

TESTIMONIALS AND GUARANTEE

SANDRA - "So my husband was taking a product called Soul and he said honey why don't you try this, see if it helps you feel better from your hiking. And I'm very skeptical, there's so many things out there that say they're going to make you feel better, every thing's going to feel wonderful and they never work, so I didn't take it for awhile. And then one day I was rummaging through the cupboards and there it was and I thought I'll take it, no big deal, so I took it and I felt pretty good. I began reading a lot on essential oils and how it helps your joints to repair quicker and I don't have as many problems with my knees, which is great. That's the bottom line you know, if I feel good and my energy levels are wonderful and I'm recovering I don't see any reason to ever stop taking it, even once I reach my goal. It helps in my everyday life...it's wonderful."

.....

MARYLYN - "My husband's friend Jeremy told us about this new product and it had great expectations and it was called Soul - he said if it does half of what it's been said to do you only stand to benefit. So, he brought us over 2 packets and I took one and I am here to tell you the next day my knee was not swollen. My knee has never returned to Ground Zero, if you will, in 20 years and I was just amazed that it could happen that quickly. And there was no pain and I had my flexibility."
